Even a number of pilots became worried when they encountered "red, orange and green" - like pancakes in the air. This press release should allay concern on the part of the public.

SEPTEMBER 5, 1957

Capt. George

4 Aug 57: 7 reports from local area

All Lit Up... Sky, That Is

Brilliant flashes of red and green light, described by weathermen at Vandalia as "one of the best displays ever seen in this area" covered the northern Miami Valley skies last night.

They are Aurora Borealis, commonly called northern lights.

The lights are caused by particles from explosions on the sun entering the atmosphere and magnetic field of the earth.

✓ 7 Reports called in to ATIC - night 4-5 Aug

✓ Ohio State Astro. Observer reports that aurora observed throughout Midwest and as far south as Houston, unusual for this time of year.
